Bedtime Story Generator

Tiancheng He

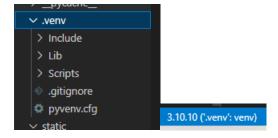

Overview

Kids love stories, but for parents, after a busy day, they could hardly come up with a new story for their kids. The stories from books will exhaust sooner or later. That's when our Bedtime Story Generator could be a good helper! The Generator enables the users to enter a very basic idea of the story, it can be anything happened from work, from any source they have read, anything interesting. Also, the generator can let the user to choose a merit to include in the story so that kids can learn something while having fun. After the story, there will be an extra interesting fact related to the story, so kids can learn some extra knowledge.

Installing

requirements.txt 2023/4/5 15:45

Use the requirements.txt to build up the venv. Use the venv to play with it.

Code

Run the generator.py, there are two main functions.

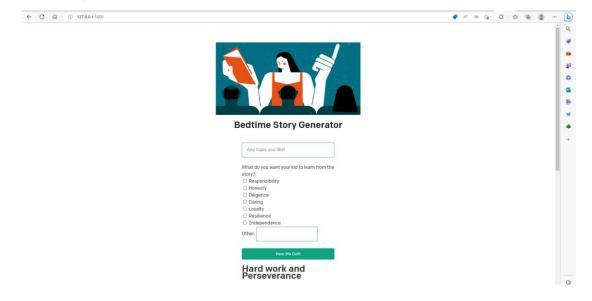

```
def get_story():
  ...
  Give flask the story generated from the generate_story function
  Parameters:
  ....
  None
  Returns:
  ....
  A html template with the generated story.
  ...
```

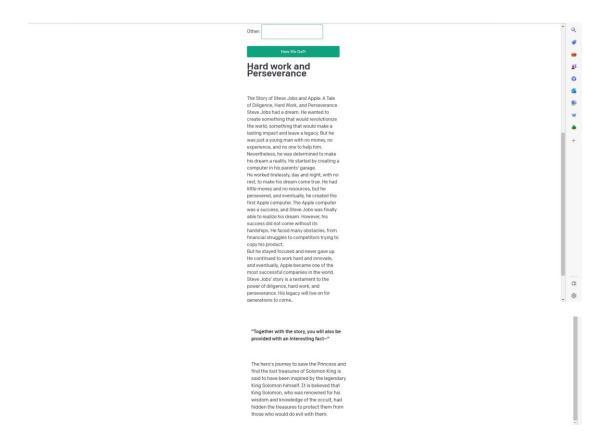

Flask

Use \$flask run to get a website, connect to it.

```
(.venv) PS C:\Users\Tiancheng He\Desktop\SI568\Openai-GPT3-story-generator> flask run
* Serving Flask app 'app' (lazy loading)
* Environment: development
* Debug mode: on
* Restarting with stat
* Debugger is active!
* Debugger PIN: 235-709-151
* Running on http://127.0.0.1:5000/ (Press CTRL+C to quit)
127.0.0.1 - [06/Apr/2023 03:08:38] "GET / HTTP/1.1" 200 -
127.0.0.1 - [06/Apr/2023 03:08:38] "GET /static/story_teller.gif HTTP/1.1" 304 -
127.0.0.1 - [06/Apr/2023 03:09:02] "POST / HTTP/1.1" 200 -
```

Use the http://127.0.0.1:5000/ to connect to the website interface:

When the story is finished, user can just type another story idea, click another checkbox and generate again!

Citing

I generated some ideas from "astro-satyam75" on github.
